Dr. Robert H. Mayberry
Acting Executive Director
Harvard Project Physics
Harvard University

Dear Bob,

Thanks for your letter and for a copy of the letter from Batisse. I had read the Midwest Research Report to which Batisse refers two years ago, but not carefully enough. Actually, I was rereading it when your letter came. For the next two weeks, I'll be in Woodshole running a small workshop to prepare us for a visit to Vietnam in August. I'll be in Vietnam all the month' of August trying to track down the herbicide story and to determine whether or not any useful studies can be done in the field. I'll contact you sometime between Woodshole and Vietnam, hoping that we can have that long postponed lunch. If you should be in Woodshole during the next two weeks, my wife and I are staying in a rented house at 96 Gardner Road. Please come by.

Warm regards,

Sincerely yours,

MM:ls
