

July 27, 1970.

Mr. Laurence Chalip  
636 Tarryton Isle  
Alameda, California 94501

Dear Mr. Chalip,

Thank you for your inquiry of June 2. It is my understanding that "pepper fog" dispensers deseminates ordinary CS. You could obtain more definitive information on this and any other riot control munitions from the International Association of Chiefs of Police, Inc. Professional Standards Division, 1319 18th Street, N. W., Washington, D.C. 20036 (Area Code 202-265-7227). The International Association has published a number of manuals giving detailed descriptions and information regarding riot control munitions.

~~Mat~~rely yours,

Matthew Meselson  
Professor of Biology
