Mrs. Sarah Meselson
Harvard University
Biology Labs
16 Divinity Avenue
Cambridge, Mass. 02138

Dear Mrs. Meselson:

Thank you very much for the information you sent on Chemical and Biological Warfare and nerve gas. I have been compiling information for our Washington office with the hope that something can be done in the way of legislation to prevent this type of dangerous situation from occurring in the future.

Again, thank you for your cooperation.

Sincerely,

Jordan Kerner
