Professor Matthew Meselson
Harvard University
The Biological Laboratories
16 Divinity Avenue
Cambridge, Massachusetts 02138

Dear Professor Meselson,

Your letter about the position at the Arms Control and Disarmament Agency reached me this morning. I appreciate very much your thinking of me in connection with the opening.

Please inquire to see if the position is still unfilled and also try to find out details on the responsibilities, rank, and salary level involved. While I am not certain that I would accept such a position if it were offered, I am very interested in pursuing the matter further. If the opportunity arises, please convey my interest to the appropriate people at ACDA.

I plan to attend the AAAS meeting in Chicago at the end of the month. Perhaps it would be possible for us to discuss the ACDA opening further sometime during the meeting.

Best wishes for a happy holiday season.

Sincerely yours,

Robert Mikulak
