

MEMORANDUM

BIOLOGY

To Paul Doty

From Matthew Meselson

Date December 29, 1970

Subject Dr. Robert P. Mikulak

Here is a candidate for the ACDA position. I wrote to Mikulak several days ago and here is his response. George Rathjens and Jean Scolnocoff both have a good opinion of him. He has a Ph.D. in Chemistry and at one point helped me a little with DBW literature research. My impression is that he is serious, intelligent, and responsible.
