Dear Matt,

Enclosed are the pictures and my story on your report which you asked me to send. Unfortunately, they cut it considerably. My original version was much longer, but at least they ran it on the front page with pictures.

I called Senator Humphrey's office and talked to his legislative assistant Tom Dougherty. Dougherty agreed with me that Humphrey should get together with you. He seemed enthusiastic and suggested that you call him. I guess Humphrey won't be in Washington much until the 27th. I also mentioned to ~~an~~ friend Bill Maynes (bright Foreign Service officer that will be working for Senator Harris for the next few months) that Harris should get together with you. Both Harris and Humphrey know me and you should feel free to use my name for what little it's worth.

Congratulations again on an important report. Please call me collect if there are new major developments in the herbicides or CBW areas, especially when you complete your scientific studies on possible damage to humans.

Warmest wishes to you and Sarah for the new year.

Yours,

Bryce Nelson
