Dear Matt:

Thanks a lot for sending me your admirable testimony before the Senate. I don't see how anyone can quarrel with either your argument or your conclusion, and I have the impression that for the moment your campaign has succeeded in keeping the Protocol safely in Committee while everyone gives the Administration a chance to think again. If this is right, it seems to me as much as could be hoped for now, and if you ever decide to run for public office give me a chance to place a few bets on the side.

Sincerely,

McGeorge Bundy
