

5 November 1971

Major James Boginis
room 2D312
Department of Defense
The Pentagon
Washington, D.C.

Dear Jim,

Here is the article by Craig Johnstone I promised. Ignore the title. He didn't choose it and was furious with the editors for using it.

One favor: Could you let me know the total number of C-123 sorties you fed into the computer in preparing the calculation of area coverage? Also, was the same number of sorties fed to the X-Y line-drawer in order to prepare the map?

Kind regards.

Sincerely yours.

Matthew Meselson
