

11 November 1971

Professor George Bunn
Law School
University of Wisconsin
Madison, Wisconsin

Dear George,

Here is a copy of the reference list I mentioned the other day. You will notice Oran Henderson of current note is co-author of one of the papers. That particular paper is interesting in that it reports that the great bulk of food destroyed is civilian, largely Montagnard. Nevertheless the paper recommends continuation of the crop destruction program because of the difficulties it was thought to cause the enemy.

Best regards.

As ever,

Matthew Meselson
