

11 November 1971

Marshall Lee Miller  
Assistant to the Administrator  
Environmental Protection Agency  
Waterside Mall SW  
Washington, D.C.

Dear Marshall,

Here are copies of our American Chemical Society symposium and our grant proposal. The grant proposal will be sent to the EPA via Harvard's Office for Research Contracts tomorrow.

I also enclose a letter and attachments from an Albuquerque law firm representing a rancher who believes that herbicide has damaged his cattle. As you know, similar claims from Globe, Arizona could not be substantiated by a Department of Agriculture team sent out to investigate. Nevertheless, the New Mexico case may be worth looking into. As these are original copies, please return them when you are finished.

It was good to talk to you on the phone this afternoon.

Sincerely yours,

Matthew Meselson
