Mr. Richard Lewis
Editor, Bulletin of the Atomic Scientists
935 E. 60th Street
Chicago, Illinois 60637

Dear Mr. Lewis,

I return the enclosed galleys to you with a few changes.

You may be interested in the three items I am also enclosing. The first two are statements by Senators Brooke and Humphrey in support of separate resolutions they have filed in the Senate dealing specifically with the Administration's position that riot gas and herbicides are not prohibited by the Geneva Protocol. In my opinion the speech by Senator Humphrey is an excellent presentation of the problem and you may wish to reproduce it. The third item is a recent statement by the Government of Canada renouncing any use of herbicides and riot gas in warfare.

S²c

Sincerely yours,

Matthew Meselson
