Dear Pete,

Two more items related to the draft speech. It is planned that the BW treaty be signed on April 10. Therefore, April 10 or some time close to that would be anatural date for the Senator to deliver the speech.

Muskie's staff might want some expert opinion to fall back on in support of statements in the speech that CS gas and herbicides have been of only marginal military value, if that, in Vietnam. I have seen Douglas Kinnard from time to time since we first made contact with him and I think he might be willing to speak with the Muskie people if they feel they need expert advice. As you probably know, Kinnard was Chief of Operations Analysis under Westmoreland in 1966-67 and was Chief of Staff of the Second Field Force in Vietnam in 1969-70.
