Admiral Gene La Rocque, U.S.N. (Ret)
Center for Defense Information
201 Massachusetts Avenue NE
Washington, D.C. 20002

Dear Admiral La Rocque,

Here are the three item numbers referring to binary chemical weapons:

6.26.07
6.36.14
6.46.10.

I believe ~~they~~ refer to the current military authorization bill that has recently been before the Senate. If someone in your office is interested in chemical weapons and should happen to learn anything about the status of the three above items, I would appreciate learning about it.

For your interest I enclose several items dealing with chemical and biological warfare that you may wish to have for your library.

It was a pleasure to meet you at the Council meeting and I look forward to seeing you again.

Sincerely yours,

Matthew Meselson
Professor of Biology
