Dear Bill,

Thank you for sending me the "teaser" for your book. I have ordered a copy of it from the Johns Hopkins Press and look forward to reading it.

I have written a short (7 page) evaluation of the Army Engineers' February 1972 study "Herbicides and Military Operations". If any of your colleagues is interested in such exotic subjects, I would value a chance to get some professional comments next time I am in Washington. It was good to hear from my "unnamed source."

With best regards,

Sincerely yours,

Matthew Meselson
