Mr. Francis Coon  
Wisconsin Alumni Research Foundation  
P.O.B. 2599  
Madison, Wisconsin 53701

Dear Mr. Coon,

The soil samples (labelled 559-562) we discussed have been forwarded to you under separate cover. They were sent to us by Mr. W. E. Garrett, National Geographic Magazine, 17th and M Streets, Washington, D.C. 20036 (202-296-7500). I have asked him to contact you concerning payment. To change slightly the arrangement we reached on the phone, could you analyze 559 for Picloram and not for 2,4,5-T, 2,4-D, etc.? Samples 560, 561, and 562 would be analyzed for 2,4,5-T, 2,4-D, etc. as before. A total of four analyses would still be involved. If this would not be satisfactory, please contact me.

Please send the results to Mr. Garrett with a copy to us,

With best regards,

Sincerely yours,

Robert W. Baughman
