Dear Matt:

I hope you were reasonably satisfied with the Senate action on the Geneva protocol. It seems to me the Senate did just what was necessary and just what most of us advocated i.e. a "clean" ratification, merely "noting", but not "approving" of the administration's views of permissible uses for riot control agents and herbicides.

I am grateful for all your activities in support of the Geneva protocol. I do believe what you did was crucial to

getting the approval of the Senate  
and hope you agree that we  
also make some contributions  
in that direction!

Season's Greetings!

Sincerely

Charlie
