Harvard University
16 Divinity Avenue
Cambridge, Massachusetts 02138

Dear Professor Meselson:

I hope the pile of stuff I sent recently had a couple of useful things in it. I've enclosed a draft of what I propose for the upcoming Pugwash event in Stockholm. I can still modify it, so would appreciate your suggestions. My primary intent is to give the Soviet participants an excuse to agree to some form of on-site access, if they are so authorized.

I know you speak and write often on arms control. Would appreciate getting on your mailing list.

Sincerely,

Robert E. Roberts
Principal Social Scientist
