Kansas City, Missouri 64110

Dear Dr. Roberts,

Thank you for the materials you sent including the most recent one for next months meeting in Stockholm. Incidentally, I was able to provide a little money from a ~~former~~ ~~newly~~ forgotten account at the American Academy of Arts and Sciences that should make up the difference needed to support your travel.

Talking with you on the telephone helped me to formulate what to say on the Today Show last Thursday. As for the actual result, it was not everything I intended but I think the main points were covered. Eleven minutes seemed more like two or three.

I haven't written anything about CBW very recently but here are a few papers of various vintage plus a bibliography. Let's keep in touch.

Sincerely yours,

Matthew Meselson
