Dear Bill,

I understand from Paul Doty that there is still an outside possibility you may be able to attend our meeting on chemical weapons, 21-22 January. I very much hope that things work out so that you can come because I feel you would bring a particularly balanced and valuable perspective.

Plans for the meeting are proceeding well. The three paper writers have finished their first drafts and the two papers from government officials (Bob Mikulak at ACDA and Gen. E.C. Meyer at DoD) are going through clearance procedures. Incidentally, as you may know, Meyer was promoted recently to Lt. Gen. and is now Deputy Chief of Staff for Operations and Plans. I enclose for your interest an updated list of acceptances.

With best wishes for the holidays,

Sincerely yours,

*Matt*
