

Congress of the United States
Committee on International Relations
House of Representatives

April 3, 1978

Dear Math,

I believe you were aware of Prof. Wald's letter to Zablocki and I therefore assume he would not object to my sharing the reply (sans 3 inches of enclosures) with you. Of particular importance is the question of U.S. compliance with Biological Convention in terms of possible added legislation. The DOD response addresses that issue beginning bottom graph on p. 2, together with Enclosure #6 which is included.

You kind cooperation in reviewing this material and sharing your reactions would be appreciated. I can be reached at 202/225-5021.

Cordially,

George R. Berdes

P.S. Have the proceedings of the Boston CW Seminar ever been published?

Dick -

I'd be grateful to you for advice on the question George

Berdes raises below.

Math
