

Carnegie Endowment for International Peace

31 August 1978

Dr. Matthew Meselson
The Biological Laboratories
Harvard University
16 Divinity Ave.
Cambridge, MA 02138

Dear Dr. Meselson:

We are pleased to let you know that the Carnegie Endowment, in conjunction with the Arms Control Association, has decided to publish in book form a selection of articles from Arms Control Today. The book will appear sometime late this fall. Your article, "What Policy for Nerve Gas" (1975), is among those selected for the reader.

We would like to include a brief statement at the end of the book entitled "about the contributors." The section will include a brief statement of 70 words about each author. Would you please send me a short biographical sketch, not to exceed 70 words, for use in this section? If your current job is different from the one you held at the time of writing the article, please indicate what you were doing at that time also. Enclosed is a sample biographical sketch. If you have any questions, please feel free to call me at (202) 797-6425. I would appreciate your sending your biographical sketch by September 20.

I'll keep you informed as the work progresses and perhaps may have to call on you for help or advice during production.

Sincerely,

Diane B. Bendahmane
Associate Director
