Dear Martin,

Enclosed you will find a typescript on Ecological Warfare by Dr. Andrej Solomatin. Dr. Solomatin suggests that it be circulated to microbiologists connected to the Pugwash Movement.

Dr. Andrej Solomatin is Assistant Professor of botany at the University of Riad in Saudi Arabia. I think he is German. I have only talked to him on the phone. His suspicion is that some of the richer developing countries under autocratic rule prepare, ostensibly for defensive purposes, ecological warfare against the densely populated industrial countries.

I am no expert in these matters, and I have had no time to study his paper. Since I expect that Dr. Solomatin will contact me again I should be grateful if you could look into this paper and let me know your opinion about this strange but, unfortunately, not entirely unplausible matter.

With best wishes,
Sincerely,

Klaus

Enclosure
