BG Niles Fulwyler, Director  
Nuclear and Chemical Affairs  
HQ, Department of the Army, 3E528  
Washington, D.C. 20310

Dear General Fulwyler,

I enclose a draft of an article entitled "Chemical Weapons and Chemical Arms Limitation" written by Julian Robinson and me for publication in Scientific American. At an earlier stage in its preparation General Falter indicated that you might be interested in seeing it. I would particularly value an opportunity to come down to Washington and discuss the manuscript with you in person, as I mentioned on the telephone to Colonel Robinson earlier this month. My telephone number during the day is 617-495-2264.

Sincerely yours,

Matthew Meselson  
Professor of Biochemistry

Encl.
