Mr Matthew Meselson
Harvard University
The Biological Laboratories
16 Divinity Avenue
Cambridge, Massachusetts 02138

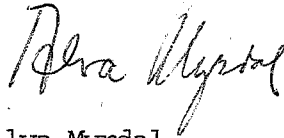

Dear Mr Meselson,

First an apology. Several letters to me have been very late in arrival, due to a box being waylaid on its way to and from our country place.

I now beg to reply to yours of December 28, 1978. It was most gracious of you to send your report on chemical weapons. It is an excellent contribution to a field too much neglected in the international defense and disarmament discussions.

With best wishes for continued success in your work.

Sincerely yours,

Alva Myrdal
