Dear Matt,

Just a belated note to thank you for sending me a copy of the excellent CW article you and Perry Robinson put together for the April Scientific American. With the exception of a few nit-picks, e.g., open storage of gas at Tooele and possible overstatement of the comfort of protective garments after extended wear, the discussion was comprehensive, balanced, and, I believe, a useful contribution to the open literature. Sometime when you have nothing to do, you might want to address the advantages and disadvantages of a bilateral vs multilateral forum for CW negotiations.

Remember Martha and me to Sarah. I'll bet your "princesses" are quite the young ladies now.

Warm regards,

A handwritten signature in cursive script that reads "Bill".
