Dear Dr Meselson,

I have sent by separate mail copies of some of my articles about anthrax. The recent one on Sverdlovsk is based on published articles & I could send you any references. I discussed this article two weeks ago with Phil Brachman at CDE and he concedes many of my points & will incorporate some in his next textbook revision.

I was very discouraged by the uncritical and hostile view of US scientists to the Sverdlovsk incident & the poor reporting etc in Science & Science News.

I should be interested in any comments you might make.

Yours sincerely

HV Wyatt

sometime Johns Hopkins
