

CBW To: Brown

13 November 1980

Mr. David Brown
US Mission to OECD
19 rue de Franqueville
75016 Paris
FRANCE

Dear Dave,

It was good to hear from you this summer and to see that you are doing interesting things at the OECD.

Enclosed is an item on chemical weapons which you may already have seen in US News & World Report. Defense and State at middle levels now seem to be strongly favorable to going ahead with the production of binary nerve gas weapons. So far as I know, the FRG government has not said anything to us officially, but somewhere down the road this issue is bound to cause serious disagreements if we continue on the present course.

Warm regards to Tuyet and your family from all of us.

Sincerely Yours,

Matthew Meselson
