Dr. Matthew Meselson
Fairchild Biochemistry Laboratory
Harvard University
Cambridge, Mass. 02138

Dear Dr. Meselson:

I enjoyed talking with you on the telephone September 16th and as I promised I am enclosing reprints of several articles on Trichothecene myotoxins which you may keep. I find it hard to believe that our Secretary of State would make the types of statements he has made during the past week based on analysis of a single sample of material of uncertain origin. I would be very interested in finding out what happens at the Congressional hearings to be held on this subject.

I hope the enclosed information is useful to you. Best of luck on your visit to Washington!

Sincerely yours,

James R. Bamburg
Professor
