Dear Colleagues:

I was most interested to read in the Abstracts of the 20th Annual Conference at Kasetsart University your "Report on the Outbreak of Anthrax in Rajaburi Province During 1981".

For some time I have been interested in the microbiology and epidemiology of anthrax. If copies are available, I wonder if you would be so kind as to send me the full paper on the subject of your abstract. Also, I would be most grateful for any other papers or references to the studies of anthrax in the region.

Sincerely,

Matthew Meselson
Professor of Biochemistry
and Molecular Biology
