Dear Professor Meselson:

Dr. Lundin has informed me about a one-day seminar on problems related to *Fusarium* and trichothecenes, which he said was going to take place on 15 April 1983 at MIT. This is certainly a subject which is of great concern to us at FOA 4, as we have been recently doing some work in this field. Dr. Lundin also said that you had suggested that it might be worthwhile if somebody from FOA 4 participated actively in the seminar, although he did not spell out exactly what kind of contribution that would be expected.

I have already planned a trip to the U.S. during the period 11-22 April, visiting various research laboratories along the east coast. The tentative itinerary is rather crowded, but it might be possible to rearrange it in order to accommodate one day in Cambridge.

If you think that I might contribute to the seminar by participating, please let me know as soon as possible. I would especially appreciate information on:

- the topics that are to be discussed,
- what kind of contribution you would expect from me, and
- the conditions for participating in the seminar.

Since there is not much time left, please do not hesitate to contact me by telex (Sweden 10366 foa s) or by phone (area code (0)90, phone number 18 92 30 or (direct line) 18 67 89 or (home number) 13 15 08).

Sincerely yours,

Johan Santesson
