

Dear Mr. N.

The material you sent looks like pollen but I did not have time to examine it closely. S.Y.

DR. MeseLSON, AND COLLEAGUES. 6-2-83

This substance appeared floating on top of RAIN POOLS ON the 28th of MAY. I don't know if there is ANY SIMILARITY IN this IN RELATION to the ARTICLE included in this letter, I would like to know if there is. Call it curiosity. ALONG the coast especially ALONG the NORTHERN OREGON coast ASIAN CURRENTS AIR MASSES AND WATER CURRENTS WASH THROUGH this AREA. SO it's NOT SUPRISING, if the AIR CURRENTS COULD CARRY FROM LAOS AND THAILAND. We get ALOT of GARBAGE ON the BEACHES FROM JAPAN. But AGAIN, to the point, is there POISON IN TRICHOtheCENE MycoTOXIN, IS this trichothecene MycoTOXIN?

I'll Admitt I AM CURIOUS ONLY BECAUSE ALL OF A sudden it WAS there.

Please Respond.

PS There's plenty of it.

David Neely.
