Department of Biochemistry and Molecular Biology
Harvard University
Cambridge, Massachusetts 02138

Dear Dr. Meselson:

Enclosed please find a copy of the article "Collection of Neurospora by Honeybees" by Shaw and Robertson. In this article the authors report collections of Neurospora intermedia macroconidia by honeybees in Australia. Similar collections of Fusaria conidia by honeybees in Southeast Asia might provide a partial explanation of the bee feces and pollen associated with mycotoxins in yellow rain samples.

Sincerely yours,

A handwritten signature in cursive script that reads "John F. Leslie".
