Mr. Jim Leach
US House of representative
Washington D.C. 20515
USA.

Sir,

We may debate on several points of your statement before the AAAS of May 31, 1983 with which I completely disagree.

However, the sentence P4, paragraph 2 "...the most dangerous is biological, the second dangerous is nuclear" is in contradiction to what is actually known on this subject. The most dangerous, by far, is nuclear, biological being the least.

Sincerely yours

Professeur H. Marcovitch
