The Producer,
Dear Sir

We turned on the 'Yellow Rain' programme after it had started and said, "Oh - look! They have a bee problem."

Some years ago we started to erect our tent on Dartmoor. After 5 minutes fitting poles, we raised the ridge of the tent to find it was turning orange before our eyes - we then noticed that we were turning orange too!

For a few seconds we watched stupefied then bundled everything into the car and found another place.

A local man told us that the bees on the hill had been trapped indoors by a fortnight's rain. Although we neither heard nor saw the bees, we had been under their flight path as they sighed with relief that just fine day.

Yours faithfully

Marion V Goodwin
