

YR-inquiries

June 26, 1984

Professor Matthew Meselson
Dept. of Biochemistry & Molecular Biology
Harvard University
7 Divinity Avenue
Cambridge, Mass. 02138

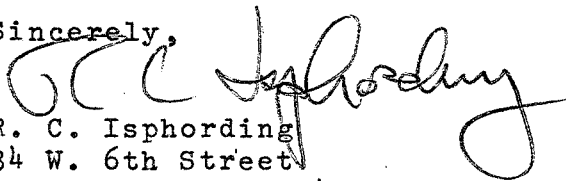

Dear Professor Meselson:

Thank you so much for your letter of June 15th and
the accompanying commentary.

Your report attempting to tell the world that yellow
rain is not a chemical designed to kill or injure
people but is merely bee droppings, is the most
ludicrous thing I have ever read.

It makes me wonder about your politics.

Sincerely,

R. C. Isphording
