Dear Martin,

Thank you for your letter, 28th Sept!

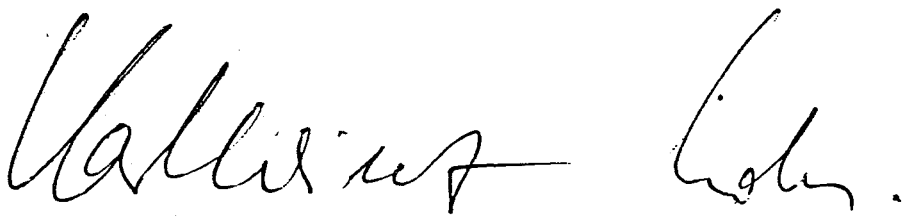

I share your view that despite some shortcomings the BW Convention has been very valuable.

At the moment I have no concrete ideas or special suggestions for the statement we have to prepare and I'm looking forward what Julian will prepare as a first draft. It seems to me that Professor Geißlers chapter on DNA-work etc in the 1984 - SIPRI - Yearbook can be useful in any respect.

From my viewpoint as a toxicologist I would support again the appeal given in the 1972 BW Convention to bring an action for the ban of all types of Chemical weapons as well as "Biochemicals" in the grey-area between the BW- and the coming CW-Convention. I hope Matthew may have some good proposals in the field.

With my best regards

ever yours

LOHS
