Dear Tom:

I enclose a copy of my revised trip report. Please let me know that you have received it.

As we discussed on the telephone, I would be most appreciative if you could let me have a report of your negative findings for T2, HT2, DAS, DON and nivalenol in the 13 samples we sent to Porton in August. It would be useful to know the approximate level of detectability for these analyses.

Sincerely yours,

Matt
