Professor Jeanne Guillemin
Department of Sociology
Boston College
Chestnut Hill, MA 02167

Dear Professor Guillemin:

Thank you for the tear sheet from Chemical and Engineering News. Matt had mentioned this autopsy to me in a telephone conversation last week. I am grateful to you for finding the time to draft an answer to the reader letters for publication in SCIENTIFIC AMERICAN. In this regard, you may be interested in the enclosed letter from Chester Mirocha and my reply. It may still be necessary to reply to the original Mirocha tirade if he chooses not to clean up his act.

I too do not know how the Kucewicz argument could be made to look like science. In fact, it is not; it is a master work of disinformation.

Let's stay in touch as the issue develops.

Sincerely,

Jonathan Piel
