

To Beasley

December 11, 1985

Dr. Val Beasley
Veterinary Biosciences
College of Veterinary Medicine
2001 S. Lincoln Avenue
Urbana, Illinois 61801

Dear Dr. Beasley,

In response to your note of November 15th, I enclose a summary of the Yellow Rain conference which took place April 15-16, 1983 at the American Academy of Arts and Sciences in Cambridge, Massachusetts. The author of each section of the summary is indicated. Since the transcript has never been reviewed by individual participants, I do not think I should circulate copies of the raw transcript.

In case you have not seen our article published in the September issue of Scientific American, I enclose a copy. I also enclose copies of letters to the Scientific American from Chester Mirocha and from us which appear in the current issue (January). We were glad to have summaries of the two points of view published side by side.

If after reading these materials there are any specific questions you would like to ask, please do not hesitate to write or telephone.

Sincerely yours,

Matthew Meselson
Professor of Biochemistry
and Molecular Biology
