Major-General Dr. Esmat Ezz
43 Misr Hellwan Road
Maadi
Cairo
EGYPT

Dear General Ezz,

My good friend, Dr. John Constable, and his wife Silvia, are planning a visit to Cairo for two weeks, starting Sunday, March 2. I hope that you will not mind that I have taken the liberty of giving John your address and telephone number. He is a distinguished plastic surgeon who practices here at the Massachusetts General Hospital and at the Shriner's Burn Hospital. He also has a deep interest in zoology and is on the board which directs the activities of Harvard's Museum of Comparative Zoology. I met John in 1970 when we toured Vietnam together to study the effects of herbicide spraying on people and the environment. The Constables will be in Cairo for about two weeks starting Sunday, March 2nd. I am certain that you would enjoy meeting each other.

In case my letter of last month did not reach you, I enclose an exchange of letters about yellow rain and trichothecenes that appeared in the January issue of Scientific American.

With warm regards,

Matthew Meselson

Professor of Biochemistry
and Molecular Biology

Enclosures

P.S. I still look forward to receiving the trichothecene analyses reports we discussed on the flight to London. M—
