Dear Matthew Meselson,

I am working on a curriculum on the Viet Nam war for high schools and beginning colleges. One of the 15 units will be on Agent Orange.

I'm writing this letter to see if you have, or could refer me to, a map showing the areas most heavily sprayed. We have the one from Science (May 1, 1970), but would like one with more recent information as that map only goes to about early 1969.

I will be sending you a draft of our Agent Orange unit in a couple weeks. Any comments you might have will be deeply appreciated. We are especially concerned that our scientific information is accurate.

Thanks for any suggestions and help you can

give.
