

April 7, 1986

To Bunner

David L. Bunner, M.D.  
Colonel, MC  
Chief, Pathophysiology Division  
Department of the Army  
U.S. Army Medical Research Institute  
of Infectious Diseases  
Fort Detrick  
Frederick, Maryland 21701

Dear Colonel Bunner,

In August 1984 you kindly sent me draft copies of two reports involving trichothecenes as well as other materials from your laboratory. At the time you suggested that I might get back to you in a year or two if still interested in the work of your laboratory on the measurement, effects and possible therapies for trichothecenes. I am indeed still interested and would be in your debt for any further reports or references you may be able to send.

Sincerely,

Matthew Meselson  
Professor of Biochemistry  
and Molecular Biology

MM:nj
