JUN 24 1986

Dear Matt:

I just returned from a small vacation and found your note with the enclosed xerox copies of the articles from the Washington Post. I had not seen them and was really pleased to have the information; Columbia is not exactly the information capitol of the world.

I do have a copy of the Canadian report on their analyses of vegetative and other samples from SE Asia for trichothecenes and, in general, was very disappointed with the nonconclusiveness of their findings. I have not seen the report on the analyses of the blood samples. If you have a copy of this report may I trouble you for a xerox copy or for a source where I can get a copy. It would be greatly appreciated.

When you do get around to publishing your views on the entire yellow rain subject, I hope you will give serious consideration to using our journal.

With best wishes.

Sincerely,

Alex
