Cambridge, MA 02138

Dear Jeff,

The work required to produce a good conference on chemical arms control can be justified only if a commensurate impact on public/elite opinion seems likely. AAAS should not co-sponsor this project unless this aspect is assured. Having the conference in the U.S. rather than Canada would certainly be a step in this direction. Let's talk about it at the meeting on 15 July.

Sincerely,

Matthew Meselson
