SEP 30 1986

Antonia Handler Chayes
Chairman

29 Sept. 1986

Dear Matthew,

Here is your Draft Report returned. It was excellent. It is very hard to imagine that such detail as you describe could be a fabrication. In short, it is very persuasive that the anthrax outbreak was entirely a natural phenomenon.

I also enjoyed reading your ACToday interview. I am in greatest admiration of the work you have been doing to develop the scientific facts that dispense some very spurious and inflammatory claims. It is of enormous importance! There is more to be done in the treaty compliance area - a little out of your field (radar calculations, other types of engineering constructs) but we should talk about how to generate the same kind of patient, scientific analysis. With regard - and many thanks for a very special evening. Tom
