Dr. Matthew Meselson
International Studies
Harvard University
Cambridge, MA 02138

Dear Dr. Meselson,

Regretably when you called, we were in an awkward stage regarding our DSI report. Here is a copy for your review and comment. Please respect the notices and disclaimers.

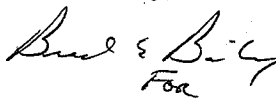

Since your call, DOE has mounted a formal effort to collect ideas and proposals for CW verification. Dr. David Green head of our Analytical Chemistry Laboratory, is leading the Argonne response.

If you are able to visit us soon, it would be beneficial to tie together our internal Argonne project briefing on progress so far in our CW concepts with a presentation by you on your knowledge of the international picture. This would fill the morning, and the afternoon could profitably be spent on direct discussions with individuals and facilities, if you wish.

If you don't mind further use of your time, we wonder if you would consider an informal lunchtime presentation on CW/BW compliance issues of your choice to the Argonne Concerned Scientists. The CAS many years ago inherited the activities of the former Chicago FAS Chapter here at Argonne.

Sorry I missed you at the January AAAS Meeting (and the December FAS Council Meeting). Hopefully I will see you here soon.

Sincerely,

A. De Volpi
