

January 16, 1990

Diane M. Kotras
Office of the Assistant Secretary of Defense
Washington, DC 20301-2600

Dear Ms. Kotras:

I am sorry to have taken so long to provide you with information on associated particle interrogation with neutrons. Argonne is not the only place where such work is going on. Someone with an excellent overview of nuclear radiation interrogation methods is Professor Lee Grodzins at MIT. His address and telephone number are:

Professor Lee Grodzins
Department of Physics
Massachusetts Institute of Technology
26-421
77 Massachusetts Avenue
Cambridge, MA 02139

(617) 253-4244.

For your possible interest I enclose a revised copy of the verification chart I presented at the AAAS meeting.

Sincerely,

Matthew Meselson
Professor of Biochemistry
and Molecular Biology

Pentagon
Room 2D 453
