Judith Meck
US Army Military History Institute
Carlisle Barracks, PA 17013

Dear Ms. Meck:

In connection with an historical study of chemical warfare, I am writing to ask if the US Army Military History Institute might have military attache reports or any other records relevant to the 1935 and 1936 use of mustard gas and other chemicals in Ethiopia. If so, how would I arrange to look at the materials and possibly obtain copies of some of these items?

Sincerely,

Matthew Meselson
