Matthew Meselson  
Dept. of Chemistry and Molecular Biology  
7 Divinity Avenue  
Cambridge, MA 02138

Dear Professor Meselson,

Enclosed is a copy of the article written by the Iraqi analyst that was presented at the Bellagio conference last year. As you will note, he attempts to minimize the importance of chemical weapons, and takes a somewhat defensive attitude concerning its use. Moreover, it put much more emphasis on the missiles. The article reflects statements made by him in private conversations.

All the best.

Sincerely,

W. Seth Carus.
