Welcome home, Matthew

Your visit was really interesting and I am the opinion that we should keep in contact regarding performance. If you find this convenient you can send the information about CANE via mail. I will pass it to Michael Holewijn, who is my coworker on the subject. If you are interested we can provide you with some papers on loss of performance, if the security problem can be solved because some of the reports are confidential.

I hope that you had a safe flight home. Will you please return the badge if you not already did so?

With warm regards, Wouter
